## MESSAGE FROM THE CHAIR OF THE SCIENTIFIC COMMITTEE

It is my great pleasure to welcome you to this conference themed “Navigating Complex GI and HPB Surgery: Beyond Limitations of Developing Countries.” This theme reflects the reality faced daily by many of us —delivering high-quality, complex surgical care despite limitations in resources, infrastructure, and systems. However, it also reflects our collective resilience, innovation, and commitment to patient-centered excellence.

This conference brings together national and international faculty, experienced consultants, young surgeons, and trainees to share practical knowledge, evidence, and honest experiences from real-world practice settings. The scientific program has been carefully designed to encourage meaningful discussions on decision-making, safety, ethics, innovation, and outcomes in GI and HPB surgery, with a strong focus on challenges relevant to developing countries.

We warmly invite you to submit abstracts for oral and poster presentations. We particularly encourage submissions that highlight original research, audits, innovative solutions, difficult case management, and lessons learned in limited-resource settings. Contributions from trainees and early career surgeons are especially encouraged.

This conference will not only serve as an academic exchange but also provide a platform for collaboration, reflection, and future directions in GI and HPB surgery.

I look forward to your active participation and valuable contribution.

With warm regards,

*Tanka Bohara*
